CHANGES THAT HAPPEN DURING PREGNANCY

Pregnancy takes a toll on your body. The postpartum period is filled with ups and downs and sometimes it can be overwhelming and frustrating. During pregnancy you may have experienced;

- Organ got squished and moved
- Diagram stopped working properly
- The pelvic floor had to handle tons of pressure
- Ribs moved to make more room
- Abs had to stretch out
- Back muscles tightness to counter the weight of the baby
- Posture changes increased
- Hormones changed

Things to avoid during this postpartum period:

Hard plyometric exercises: burpees, running stairs, jumping, and running

Front Ab exercises: sit-ups, push-ups, exercises that make your abs bulge. We will dive deeper into why in the next section.

Breathing is important during pregnancy but is key to recovery postpartum. It can help organs move back into place, get the diagram working correctly, lengthens and contracts the pelvic floor, help the ribs and abs move back into place, this is just to name a few. It also help activated the parasympathetic nervous system which allows the body to relax.

BREATHING 101

After pregnancy, breathing is more important than ever. If throughout pregnancy a continuous effort to keep the inhale down and stay connected to the pelvic floor with a good exhale wasn't made, you are probably in a paradoxical breathing pattern (breathing upwards).

The majority of women I have worked with are in an upwards breathing pattern. When relearning breathing the goal is not belly breathing but working on getting the bottom six ribs to move to the side, back, and out.

Upwards breathing causes the use of secondary muscles that often will lead to pain and tightness. By breathing upwards we can not properly engage the core or manage pressure. This will be essential to have a successful postpartum exercise journey.

Time to get to work, remember this is going to take time and practice. Be sure to work on breathing any chance you get. Whether that is breathing while lying in bed at night or working on the computer the goal is to practice, practice, practice!!!

THE PELVIC FLOOR CONNECTION

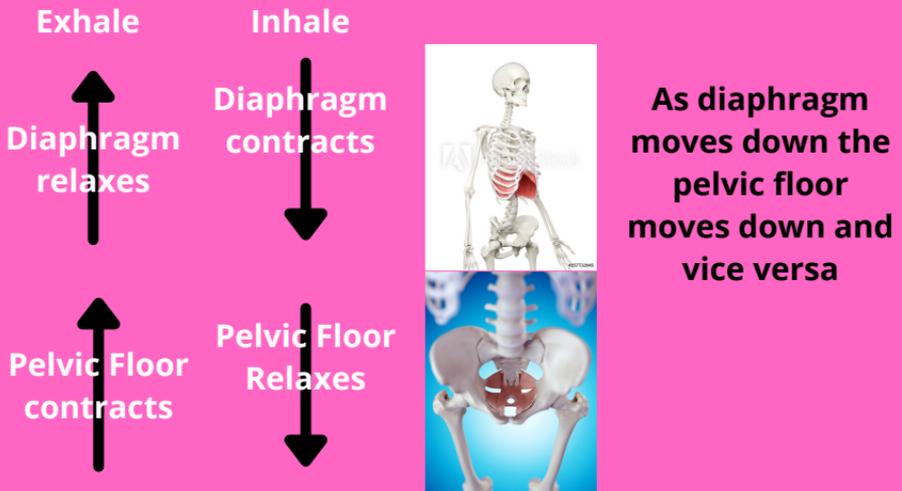

Breathing and the Pelvic Floor

When thinking about the relationship between the diaphragm (breathing muscle) and pelvic floor, you can think about it as a canister or piston.

As you breathe in the diaphragm contracts downward, this increases the intra-abdominal pressure pushing on the pelvic floor causing it to lengthen.

As you breathe out the diaphragm moves upward to its original position and the pelvic floor also moves upward to its resting position.

How intra-abdominal pressure impacts your pelvic floor is dependent on a lot of factors. Diastasis recti and posture are two factors that influence the movement of pressure within the canister. When not managed correctly intra-abdominal pressure can cause pelvic floor dysfunction.

BREATHING EXERCISES

TOP THREE EXERCISES TO GET 360 RIB EXPANSION

EXERCISE VIDEOS

Equipment: None

360 Movement

2 ROUNDS

Side-Lying Breathing 3-5 Breaths
Child Pose Breathing 3-5 Breaths
Lying on Back Breathing 3-5 Breaths

PHASE ONE

GET THOSE RIBS MOVING

We have talked about breathing a lot, I know, but that is because I don't think I will ever be able to convey just how important it is to your postpartum journey. Enough of the talking and more of the doing. To get a good breath down and really start to stretch the pelvic floor we have to get the diaphragm moving in the right direction. We call this 360 breathing. That means getting the ribs to move in all directions. That is the goal of this phase. We will focus on mobilizing those ribs and lengthening the pelvic floor.

PHASE ONE

Equipment: None

Warm-Up

2 ROUNDS

Side-Lying Breathing 3-5 Breaths

Child Pose Breathing 3-5 Breaths

Super Set 1

2 ROUNDS

Open Book with 3 Second Hold 5 each side

Hip Flexor 30 sec each side

Cat to Table 5 reps

PHASE TWO

CONNECTING TO THE PELVIC FLOOR

You have successfully got that breath to move down!! That is amazing, it was one of the hardest parts of my journey. Now that we have lengthened the pelvic floor it is time to contract. The key to a strong muscle is two parts; lengthen and contract. For example, if I was doing a bicep curl, I would straighten my arm the bend. Imagine if you didn't do both those parts, how effective would that exercise be? What if I just kept my elbow bent the whole time? Or never actually did the curl portion of the exercise?

The goal of this phase is to connect with those pelvic floor muscles. When we don't use muscles we lose that pathway, or the ability to contract that muscle, throughout pregnancy that pathway is challenged. So it is time to reconnect and build up the neuromuscular pathway.

The focus in this phase will be the exhale, that is how we are going to connect to both the pelvic floor and those deep core muscles. Visualize pull up a string as you exhale, let's get connected.

As all of our products are digital, they are deemed “used” after purchase or download. We have a no refund policy in regards to dissatisfaction with a product. You may cancel your subscription at any time, and you will continue to have access to the Mama Said Move LLC service through the end of your Monthly or Quarterly or Annual billing period. Refunds will not be provided for any partial-month, partial quarter, or partial year membership periods or unwatched Mama Said Move content.

ADDITIONAL INFORMATION

Mama Said Move LLC reserves the right to amend any information, including but not limited to prices, technical specifications, terms of purchase and product offerings without prior notice.

SALES POLICY

The purchase of products on this website is subject to the following terms and conditions.

- Each PDF download and online content sold is licensed to a single user only. Customers are not allowed to copy, distribute, share and/or transfer purchased product/s to any third party or person.
- All purchases to Mama Said Move LLC are non-refundable. Since the products made available here are electronic, we cannot accept any request for refunds.

In the case where a purchase error is made please contact us at mamasaidmove@gmail.com to discuss a resolution.

By placing an order with Mama Said Move LLC, you warrant that you are at least 18 years old and accept these terms & conditions, which shall apply to all orders placed.

ONLINE PERSONAL TRAINER/CLIENT AGREEMENT

I do hereby consent to participate in a personal training program that may include weight training and/or cardiovascular exercise. Because physical exercise can be strenuous and subject to risk of serious injury (including but not limited to musculoskeletal injury, spinal injuries, abnormal blood pressure responses, and rare instances heart attack or death), it is urged that I obtain a physical examination from a doctor before using any exercise equipment or participating in any exercise activity. I agree that by participating in physical exercise or training activities, I do so entirely at my own risk.

Any recommendation for changes in diet including the use of food supplements, weight reduction and/or body building enhancement products are my responsibility and I agree that I have been informed to consult a physician prior to undergoing any dietary or food supplement changes. I agree that I am voluntarily participating in these activities and assume all risks of injury, illness, or death.

This waiver and release of liability includes, without limitations, all injuries which may occur as a result of; a) my participation in any activity, class, program, personal training, supervision, or instruction, b) instruction, training, supervision, or dietary recommendations made by Mama Said Move LLC. I acknowledge that I have carefully read this "waiver and release" and fully understand that it is release of liability. I expressly release and discharge the trainer/instructor from any and all claims or causes of action and you agree to voluntarily give up or waive any right that I may otherwise have to bring a legal action against Mama Said Move LLC for personal injury or property damage. If any portion of this release from liability shall be deemed by a Court of competent jurisdiction to be invalid, then the remainder of this release from liability shall remain in full force and effect and the offending provision or provisions severed here from. By agreeing to these terms and conditions, I acknowledge that I understand its content and that this release cannot be modified orally.
